INDEX FOR VOLUME 47

Articles

Bentler, Peter M. (see Weeks, David G.)

Berenson, Mark L. A comparison of several k sample test for ordered alternatives in completely randomized designs. 265–280. [see Erratum]

Carroll, J. Douglas (see Pruzansky, Sandra)

Degerman, Richard L. Ordered binary trees through an application of Kendall's tau. 523–527.

de Leeuw, Jan. Generalized eigenvalue problems with positive semi-definite matrices. 87–93.

Della Riccia, Giacomo & Shapiro, Alexander. Minimum rank and minimum trace of covariance matrices. 443–448.

DeSarbo, Wayne. GENNCLUS: New models for general nonhierarchical clustering analysis. 449–475.

DeSarbo, Wayne S., Hausman, Robert E., Lin, Shen & Thompson, Wesley. Constrained canonical correlation. 489–516

Dorans, Neil J. (see Drasgow, Fritz)

Drasgow, Fritz, Olsson, Ulf & Dorans, Neil J. The polyserial correlation coefficient. 337–347.

Dunn, Terrence R. & Harshman, Richard A. A multidimensional scaling model for the size-weight illusion. 25–45.

Ferligoj, Anuska & Batagelj, Vladimir. Clustering with relational constraint. 413–426.

Hagglund, Gosta. Factor analysis by instrumental variables methods. 209–222.

Harshman, Richard A. (see Dunn, Terrence R.)

Hausman, Robert E. (see DeSarbo, Wayne)

Huynh, Huynh. A Bayesian procedure for mastery decisions based on multivariate normal test data. 309–319.

Langeheine, Rolf. Statistical evaluation of measures of fit in the Lingoes-Borg procrustean individual differences scaling. 427–442.

Lee, Sik-Yum & Tsui, Kwok Leung. Covariance structure analysis in several populations. 297–308.

Lin, S. (see DeSarbo, W.)

Macready, George B. The use of latent class models for assessing prerequisite relations and transference among traits. 477–488.

Masters, Geoff, N. A Rasch model for partial credit scoring. 149–174.

Miyano, Hisao & Inudai, Yukio. Sequential estimation in multidimensional scaling. 321–336.

Meredith, William & Tisak, John. Canonical analysis of longitudinal and repeated measures data with stationary regression weights. 47–67.

Nukai, Yukio (see Miyano, Hisao)

Pruzansky, Sandra, Tversky, Amos & Carroll, J. Douglas. Spatial versus tree representations of proximity data. 3–24.

Ramsay, James O. When the data are functions. 379–396.

Raslear, Thomas, G. On the use of bisection procedures in animal psychophysical scaling. 95–99.

Rozeboom, William W. The determinacy of common factors in large item domains. 281–295.

Rubin, Donald B. & Thayer, Dorothy T. EM algorithms for ML factor analysis. 69–76.

Shapiro, Alexander. Local theorems and sampling theory of minimum factor analysis. 187–199.

Shapiro, Alexander. Weighted minimum trace factor analysis. 243–264.

Shapiro, Alexander (see Della Riccia, Giacomo)

Takane, Yoshio. Maximum likelihood additivity analysis. 225–241.

Thayer, Dorothy T. (see Rubin, Donald B.)

Thissen, David. Marginal maximum likelihood estimation for the one-parameter logistic model. 175–186.

Thissen, David (see Wainer, Howard)

Thompson, W. (see DeSarbo, W.)

Tisak, John (see Meredith, William)

Tsui, Kwok-Leung (see Lee, Sik-Yum)

Tversky, Amos (see Pruzansky, Sandra)

Tyler, David E. On the optimality of the simultaneous redundancy transformations. 77–86.

Ulsson, Ulf (see Drasgow, Fritz)

van den Wollenberg, Arnold L. Two new test statistics for the Rasch model. 123–140.

Wainer, Howard & Thissen, David. Some standard errors in item response theory. 397–412.

Weeks, David G. & Bentler, Peter M. Restricted multidimensional scaling models for asymmetric proximities. 201–208.
Williams, Richard H. (see Zimmerman, Donald W.)
Zimmerman, Donald W. & Williams, Richard H. The relative error magnitude in three measures of change. 141–147.

Notes and Comments

Andrich, David. An extension of the Rasch model for ratings providing both location and dispersion parameters. 105–113.
Chaiy, Seoil (see MacKay, David B.)
de Leeuw, Jan. A note on partitioned determinants. 531–534.
Divgi, D. B. (see Dolker, Michael)
Dolker, Michael, Halperin, Silas, & Divgi, D. B. Problems with bootstrapping Pearson correlations in very small bivariate samples. 529–580.
Ekbohm, Gunnar. On testing the equality of proportions in the paired case with incomplete data. 115–118.
Finkbeiner,' Carl T. & Tucker, Ledyard R. Approximate uniqueness estimates for singular correlation matrices. 517–521.
Halperin, Silas (see Dolker, Michael)
MacKay, David B. & Chaiy, Seoil. Parameter estimation for the Thurstone Case III model. 353–359.
McDonald, Roderick P. A note on the investigation of local and global identifiability. 101–103.
Phillips, J. P. N. A simplified accurate algorithm for the Fisher-Yates exact test. 349–351.
Tucker, Ledyard R (see Finkbeiner, Carl T.)

Reviews

Arabie, Phipps. Review of *Group Choice* by Boris G. Morkin. 361–364.
Lucke, Joseph R. Review of *Regression Diagnostics: Identifying Influential Data and Source of Collinearity* by D. A. Belsley, E. Kuh, and R. E. Welsch. 365–367.
Shafer, Glenn. Review of *Statistical Decision Theory: Foundations, Concepts, and Methods* by James O. Berger. 119.
Tenenhaus, Michel. *Analysis of Categorical Data: Dual Scaling and Its Applications* by Shizuhiko Nishisato. 120–121.

Errata

Aitkin, M. (see Bock, R. D.)
Berenson, Mark L. Erratum for A comparison of several k sample test for ordered alternatives in completely randomized designs. 535–539.
Bock, R. D. & Aitkin, M. Errata to Marginal maximum likelihood estimation of item parameters: Application of an EM Algorithm. 369.
